

ADETEX SN

Product Description:

ADETEX SN is a concentrated agent for circular knitting machines, produced on the basis of specially selected mineral oils and non-ionic emulsifiers. It is rinsable with water without adding detergents.

Use:

ADETEX SN is used concentrated for the lubrication of circular knitting machines. Pour into the dosing tank as necessary.

Physical and Chemical Properties:

Characteristic, Unit	Referential Values			Method
Viscosity Grade	15	22	32	
Appearance	Clear fluid			Visual
Rinse ability	Easy rinsable			-
Viscosity at 40°C, mm ² /s	15	22	32	ASTM D 445
Flash Point, °C	> 150			ASTM D 92
Tolerance	Anion active and cation active agents			-

Storage:

Store under normal conditions at a temperature not lower than 15 °C.
Storage at a lower temperature may occur layering, in which case carry in the agent into the warm room and mix.

Packaging: 60 ml
