

ADECO® REMOVER

Product Description:

This special mixture of oils and alcohol creates a quick penetrating, high solvency lubricant spray. Cuts through rust and corrosion, frees and lubricates nuts and bolts. Does not contain resin, acids, silicones and Freon. Does not damage rubber and plastic.

Purpose:

Releases tightly rusted parts such as nuts, bolts, valves, pins and the other metal connections. Inhibits further rust and corrosion.

The Main Advantages:

- Removes corrosion from highly damaged parts;
- Lubricates and protects a variety of tools and parts;
- Protects metal from rain and salt;
- The tube enables the application in places hard to reach.

Physical and Chemical Properties:

Temperature range of application, °C	-10 – 140
Self-ignition temperature, °C	220
Active substance concentration, %	80

Application:

Clean the surface well before use, spray from 15-20 cm distance and wait for 4-5 minutes then unwind. Before use, shake the bottle.

Meet Specifications:

SRPS Z.M9.050.

Packaging:

Spray 300 ml

The bottle is under pressure. Keep away from the source of heat and the reach of children.
